

## **Amendments to the Claims:**

The listing of claims will replace all prior versions and listings of claims in the application:

### **Listing of Claims:**

Claim 1 (Original) A composition for hair treatment comprising discrete droplets characterised in that the droplets, within the same droplet comprise both;

- (i) a functionalised silicone selected from amino-, carboxy-, betaine-, quaternary ammonium-, carbohydrate-, hydroxy- and alkoxy- substituted silicones; and,
- (ii) a hydrocarbon oil;

wherein the discrete droplets comprise at least 5% by weight of functionalised silicone and at least 5% by weight of hydrocarbon oil expressed as a percentage of the weight of the droplets.

Claim 2 (Original) A composition according to claim 1 comprising at least 0.25% by weight of the discrete droplets.

Claim 3 (Currently Amended) A composition according to ~~any preceding claim~~claim 1, wherein the functionalised silicone is an amino-functionalised silicone.

Claim 4 (Original) A composition according to claim 3, wherein the amino-functionalised silicone has a weight percentage amine functionality from 0.3% to 8%, preferably from 0.5% to 4%.

Claim 5 (Currently Amended) A composition according to ~~any preceding claim~~claim 1 wherein the hydrocarbon oil has a kinematic viscosity of less than  $500 \text{ mm}^2 \text{ s}^{-1}$  at  $25^\circ\text{C}$ .

Claim 6 (Currently Amended) A composition according to ~~any preceding claim~~claim 1 wherein the kinematic viscosity of the functionalised silicone is less than  $1900 \text{ mm}^2\text{s}^{-1}$  at  $25^\circ\text{C}$ .

Claim 7 (Currently Amended) A composition according to ~~any preceding claim~~claim 1 wherein the mean droplet diameter ( $D_{3,2}$ ) of the discrete droplets is from 0.05 to 25 micrometres.

Claim 8 (Currently Amended) A composition according to ~~any preceding claim~~claim 1 wherein the discrete droplets further comprise an emulsifying agent.

Claim 9 (Original) A composition according to claim 8 wherein the emulsifying agent comprises a nonionic surfactant.

Claim 10 (Currently Amended) A composition according to ~~any preceding claim~~claim 1 wherein the discrete droplets are added to the composition as a non-aqueous phase of a pre-formed aqueous emulsion.

Claim 11 (Currently Amended) A composition according to ~~any preceding claim~~claim 1 which is a shampoo composition comprising at least one cleansing surfactant selected from anionic, cationic, nonionic, amphoteric and zwitterionic surfactants and mixtures thereof.

Claim 12 (Currently Amended) A composition according to ~~any one of claims 1 to 40~~claim 1, which is a conditioner composition comprising at least one conditioning surfactant and a fatty alcohol and/or an alkoxylated fatty alcohol.

Claim 13 (Original) A method for incorporating discrete droplets comprising both a functionalised silicone selected from amino-, carboxy-, betaine-, quaternary ammonium-,

carbohydrate-, hydroxy- and alkoxy- substituted silicones; and a hydrocarbon oil in the same droplets, into a hair treatment composition, comprising the steps of;

- (i) forming an intimate, non-aqueous blend comprising the functionalised silicone and the hydrocarbon oil;
- (ii) preparing an aqueous emulsion comprising droplets comprising both a functionalised silicone and a hydrocarbon oil in the same droplets and
- (iii) mixing said aqueous emulsion with the hair treatment composition.

Claim 14 (Original) A method according to claim 13 wherein the aqueous emulsion further comprises an emulsifying agent.

Claim 15 (Currently Amended) The use of a hair treatment composition according to ~~any one of claims 1 to 11~~claim 1 for the conditioning of hair.

Claim 16 (Currently Amended) The use of a hair treatment composition according to ~~any one of claims 1 to 11~~claim 1 as a conditioning shampoo.
